

MULTI-SEAT Streaming License FAQ's

1. What is the multi-seat streaming license?

The multi-seat streaming license is a self-administered online streaming product that allows an administrator to grant access to multiple users within his/her organization.

2. How do I purchase the multi-seat streaming license?

You can purchase a multi-seat streaming license at our sales stand or you can email sales@sok-media.com

3. What is included in the multi-seat streaming license?

You can purchase multi-seat licenses for individual events or you can purchase access to both DEV and IUC events for a year. For instance, you can purchase multi-seat licenses that grant access to DEV AND IUC.

4. How many seats can I purchase?

You can purchase as few as 2 seats and as many as 50.

5. What is the cost for each additional seat?

Seat 1 is listed on the order form or online.

Seat 2 is 50% more than Seat 1. So, if Seat 1 costs \$199, then Seat 2 costs \$99 for a total of \$298.

Seats 3 – 9 are 25% more than the Seat 1 price. If you purchase 3 seats the cost would be $\$199 + 99 + 49 = \347 and each additional seat through 9 will cost \$49.

For 10 or more licenses, please contact sales@sok-media so we can arrange for additional discounts.

6. How are users "designated" – added, deleted?

Upon purchase, an administrator is set up. This person will have access to our administrator portal and can designate additional users, delete users, and grant user access to specific events. If the administrator has designated a user and that user leaves the company or division, he/she can re-assign that seat to a new user via the portal.

7. I own 5 Seats but want to have different users for each event, is that possible?

YES, each seat is assigned by event. So you can have 5 users for DEV and 5 different users for IUC if you wish.

8. How long will the licenses be active?

The 2017 licenses will be active until at least December 31, 2018.

9. Can I purchase the USB drive as well as a multi-seat license?

Yes, that option is also available.
